Abstract (en)

[origin: WO2022128181A1] The invention relates to a fuse (1), in particular an SMD fuse and/or an instrument fuse, comprising an insulator (2), a fusible conductor (3) arranged in the insulator (2), and outer contact caps (4) which are placed on the insulator (2) and are electrically connected to the fusible conductor (3). According to the invention, in order to be arranged in a stable position in the insulator (2), the fusible conductor (3) is at least frictionally engagingly attached by means of an attachment device (8).
