Abstract (en)

[origin: WO2022156989A1] The invention relates to a sample-holder element for use in or with a laboratory device (1), wherein the sample-holder element (3) is designed to hold a sample to be processed by means of the laboratory device (1) and is penetrated by a magnetic field (20) while the laboratory device is in operation, and wherein the sample-holder element (3) is designed to interrupt, at least in portions, an electrical current (21) which is induced by changes in the magnetic field that penetrates the sample-holder element (3).
