Abstract (en)
[origin: EP4265386A2] Machine (100) for casting ceramic materials and compounds with weight zeroing apparatus adapted for reducing to a minimum the physical effort required by operators on site, said machine (100) being developed in height, allowing to increase production and saving space and energy. The machine (100) comprises a frame (10); a control panel (11); molds formed by a female part (19') and a male part (19); a lower movable cradle (15) with at least one female part (19'), mobilized towards the intermediate movable cradle (14), allowing the closure of the molds (19-19'); an upper movable cradle (13) with at least one male part (19), mobilized towards said intermediate movable cradle (14), allowing the closure of further molds (19-19'); an intermediate movable cradle (14) with corresponding male parts (19) and female parts (19'), positioned between said lower movable cradle (15) and said upper movable cradle (13); a weight zeroing trolley (12) which, when aligned with one of said movable cradles (13, 14, 15), allows the removal, without physical effort, of the molds (19-19') by an operator.
