Abstract (en)

[origin: WO2022135863A1] The present invention relates to a composition comprising a therapeutically effective amount of bilastine having a particle size distribution D90 from 15 to 90 µm measured by laser diffraction; and a pyrrolidone- based polymer; together with one or more pharmaceutically acceptable excipients or carriers; and a process for its preparation. It also relates to the use of the composition in the treatment of histamine-mediated disease processes and allergic reactions.
