Abstract (en)

[origin: WO2022258741A2] The invention relates inter alia to the problem of being able to transfer material, in preparation for a transfer of a transfer material from a transfer bag into a sterile region in a second step, in order to introduce the transfer material into the transfer bag in a sterile manner. This is achieved inter alia by a transfer bag with a cutting tool introduced into the interior thereof in a sterile manner. The transfer bag can be coupled to an outer packaging of the transfer material for sterile transfer of the transfer material from the outer packaging into the transfer bag. In addition to a transfer bag, the invention also relates to a method and a transfer set.
