Abstract (en)

[origin: CA3203228A1] The invention relates to a device and a method for handling volatile powders. The device comprises a hermetically sealed chamber (12) comprising a hatch (20) able to close an opening (16) made through a wall (18) of the hermetically sealed chamber (12), on the outside of the hermetically sealed chamber (12), the device (10) comprising:- a flexible container (26) intended to receive a package (24) containing volatile powders (22),- means for sealed attachment of the flexible container (26) of which an opening (28) mates in a sealed manner with the opening (16) of the hermetically sealed chamber (12),- a mobile support (36) on which the flexible container (26) rests,- a mechanism (40) for moving the mobile support (36) translationally toward the opening (16) of the hermetically sealed chamber (12).
