Abstract (en)

[origin: WO2022136119A1] A sliding guide shoe for guiding a counterweight (3) comprises a single-piece guide element (11) made of a plastic, said guide element having an engagement element (13), which extends in the longitudinal direction (z) and can be brought into interlocking engagement in a cutout (21) in the yoke (7, 8) of a counterweight frame (6). Furthermore, the guide element (11) comprises a collar (14) for engaging around the cutout (21) and for forming a stop for positionally securing the guide element (11), said collar adjoining the engagement element.
