Abstract (en)

[origin: WO2022139216A1] The present disclosure relates to a cell reselection in wireless communications. According to an embodiment of the present disclosure, a method performed by a wireless device in a wireless communication system comprises: receiving information related to a service time of a neighbor cell; obtaining a cell quality of the neighbor cell based on a measurement on the neighbor cell; determining a remaining service time for the neighbor cell as a time period from a current time point to an end time point of the service time of the neighbor cell; and performing a cell reselection to the neighbor cell based on the cell quality of the neighbor cell and the remaining service time for the neighbor cell.
