Abstract (en)
Provided is a tobacco composition that enables a tobacco flavor to be fully expressed and aerosols to be sufficiently generated. The tobacco composition contains a first material including a tobacco component, and a second material including at least 25 mass% of an aerosol-generating agent, wherein the content of the aerosol-generating agent included in the first material is less than 25 mass%, and the mass percentage of the second material with respect to the total mass of the first material and the second material is at least 15 mass%.
