Abstract (en)

A rod-shaped heat-not-burn tobacco product equipped with a tobacco rod section and a mouthpiece section, wherein: the mouthpiece section has a cooling segment and a filter segment containing a filter medium; the cooling segment and the filter segment are adjacent to one another, and the tobacco rod section contains dried leaf tobacco and a flavor-containing material comprising a flavoring agent contained in a polysaccharide gel. Also provided is an electrically heated tobacco product which uses said heat-not-burn tobacco product.
