Abstract (en)

[origin: WO2022158691A1] The present invention relates to a chin-guard gap adjustment means for a helmet. The chin-guard gap adjustment means (100) for a helmet according to the present invention is mounted to a helmet that comprises: a helmet body (10); and a chin guard (20) which is rotatably coupled to the helmet body (10) and can rotate from a position in front of the chin of a wearer to a position behind or above the helmet body (10). The chin-guard gap adjustment means is coupled to the chin guard (20) and adjusts the space between the chin guard (20) and the helmet body (10).
