Abstract (en)

[origin: WO2022144260A1] The present invention relates to a portable sensor device for a horse, comprising: a fastening device for attachment on a leg of a horse; at least one sensor unit for detecting motion data of the sensor unit; a receiving device for receiving data of the sensor unit; and an evaluation unit for evaluating the data of the sensor unit received by the receiving device, wherein the at least one sensor unit can be attached to the fastening device so as to be removable, the evaluation unit has a detection unit for identifying the type of the fastening device, and the evaluation unit is designed to evaluate the data of the sensor unit depending on the type of fastening device. The invention further relates to a kit of parts and to a corresponding method.
