Abstract (en)
[origin: WO2022139712A1] The invention relates to an oven comprising a muffle (20) confining a cooking chamber with two opposing lateral walls (23), an upper wall (21) and an opposite lower wall (27) a partition wall (28) provided therebetween; a blower (30) provided behind the partition wall (28), and a control unit (10) connected to a motor (33) of the blower (30) with rotatably arranged multiple blades (31) so as to drive in a cooking mode. The oven further comprises a first air blow opening (22) provided on the partition wall (28) and allowing transfer of hot air from the blower (30), and a second air blow opening (24) having a second center (m2) aligned asymmetrically with respect the horizontal axis (x) passing through an imaginary a first center (m1) in the middle of the first air blow opening (22) and disposed at a distance at the horizontal axis (x) from the first air blow opening (22).
