Abstract (en)
A reservoir dispenser (120) for a bidet apparatus (100) includes a housing unit having a first chamber (151) and a second chamber (152), wherein the first chamber (151) is capable of holding a liquid wash solution separate from the second chamber (152). A side check valve (177) between a hollow barrel (157) and the first chamber (151); and a bottom check valve (158) between the first chamber (151) and the second chamber (152) allows for controlled release of the liquid wash solution from the first chamber (151) to the second chamber (152).
