Abstract (en)

[origin: CA3204775A1] The invention relates to a device (1) for cultivating and for protecting forest and/or crop plants, which device comprises: a protective structure (5) for protecting forest and/or crop plants from damage; a substrate (3), loaded into the protective structure (5), on/in which at least one seed of a forest and/or crop plant can be placed/inserted in order to cultivate a seedling therein; and is characterised in that the protective structure (5) is closed at one end in order to hold and store the substrate (3). The invention also relates to a planting device for planting a device for cultivating and for protecting forest and/or crop plants. The invention also relates to a method for cultivating and for protecting forest and/or crop plants by means of such a device (1), and to the use of the device.
