Abstract (en)

[origin: WO2022148702A1] The invention relates to an aerosol generation device, in particular an aerosol generation device for providing an aerosol comprising: means for receiving and heating a consumable liquid to generate an aerosol; and means for limiting the size of droplets of the aerosol which are provided to the user drawing on the mouthpiece, comprising an air flow channel through which the aerosol flows towards the user when the user draws on the mouthpiece, and comprising at least one passage with an adjustable through area.
