Abstract (en)
[origin: WO2022148776A1] The invention relates to a jewelry item (1) which surrounds a body part and is especially worn by a human being. A disadvantage of prior art jewelry items (1) surrounding a body part is that a multitude of different sizes of the jewelry item (1) have to be provided and/or that the size, in particular of used jewelry items (1), has to be adapted. The present invention overcomes these disadvantages by using at least one leaf spring (4) and connecting it to the rest of the jewelry item (1) by means of securing pins.
