Abstract (en)

[origin: WO2022150406A1] This disclosure provides systems, devices, apparatus, and methods, including computer programs encoded on storage media, for handling of QoE measurements. In aspects, a UE may transmit, to a base station, an indication of one or more UE capabilities for at least one of multiple instances or simultaneous instances of one or more QoE measurements at the UE associated with one or more types of services, and receive, from the base station, a QoE measurement information configuration for the QoE measurement information associated with the one or more types of services based on the indication that of the one or more UE capabilities.
