Abstract (en)
The present invention relates to a joint system for joining precast ground beams (205, 206, 207, 208) together. The joint system comprises a first joint part (101) for a first precast ground beam (205, 206) and a second joint part (102) for a second precast ground beam (207, 208), which joint parts (101, 102) can be locked together by using at least one locking pin (103, 104). The present invention also relates to a foundation for a building.
