Abstract (en)
[origin: WO2022154926A1] A fabrication facility for manufacturing a laminate multi-layer enclosure component having a press table; a conveyor table adapted to move a plurality of superposed planar fabrication elements of a multi-layer enclosure component placed thereon into the press table; a first rotatable turntable proximate to a first side of the conveyor table, and a second rotatable turntable proximate to an opposed second side of the conveyor table. The first rotatable turntable is adapted to have positioned thereon plural stacks of planar fabrication elements and to move each of such plural stacks to a first access position on the first rotatable turntable; and the second rotatable turntable adapted to have positioned thereon plural stacks of planar fabrication elements and to move each of such plural stacks to a second access position on the second rotatable turntable. A movable adhesive spray gantry straddles the conveyor table.
