Abstract (en)

[origin: WO2022152936A1] An air/gas exhaust port protector comprises a body (1) with an inlet portion (9) and a chamber portion (10) that branches of in outlet channels (11). A first transition wall (14) extends between the inlet and chamber portions and comprises a circumferential ledge 15 that projects forward into the chamber portion. An end cap (4) is releasably connected with a connection portion (22) to the body and delimits a head end of the chamber portion. The cap comprises a flow guider portion (25) that projects into the chamber portion. A second transition wall (26) extends between the connection and flow guider portions. A sleeve-shaped filter 2 fits inside the chamber portion with the ledge projecting into an upstream head end (18) of the filter and with the flow guider portion projecting into a downstream head end (29) of the filter.
