Abstract (en)

[origin: WO2022152452A1] The invention relates to a method for playback of a video stream by a client (C), wherein the video stream has frames from exactly one camera in relation to an object moving relative thereto, from different positions, the method comprising the steps of • receiving a video stream (VB) from an encoder (SRV), • decoding the received video stream (VB) using camera parameters (CP) and geometry data (GD), • playing back the processed video stream (AVB).
