Abstract (en)

The present disclosure discloses a blanking-type granular aerosol generating product, wherein, the product includes a main part and an outer sleeve located outside the main part (5); the main part includes an inner tube (1) as well as a filter component (2) and a hollow component (3) in the inner tube (1), the hollow cavity of the hollow component (3) has an aerosol source-material granule component (4); the outer sleeve (5) has a top opening (51) and a sealing bottom surface (52), the sealing bottom surface (52) is used to plug the aerosol source-material granule component (4) in the hollow component (3); the outer sleeve (5) can axially move relative to the main part to form a cavity (6) between the upstream end face of the hollow component (3) and the sealing bottom surface (52), the aerosol source-material granule component (4) contained in the hollow component (3) falls into the cavity (6) under the action of gravity, and the hollow cavity area of the hollow component (3) forms an airflow channel (7).
