Abstract (en)  
The invention relates to a method and a system for sorting parcels in a parcel sorting system from a sortation system, which may comprise conveyer belts, into chutes. Further, the invention relates to monitoring the filling degree and the filling rates of the chutes, and to send out a warning, if a chute is filling up, and if no operators are assigned to the chute, which is filling up, to assign operators to the chute, before it is filling up, avoiding stop of discharging parcels to a chute.
