Abstract (en)

[origin: WO2022157475A1] An article (and a method of manufacturing an article) for use with a non-combustible aerosol provision system is described. The article may comprise a rod of aerosol generating material and a hollow tube in axial alignment with the rod of aerosol generating material. The hollow tube may have a weight less than 8.5 mg/mm in an axial direction. The hollow tube may comprise a plurality of layers of a sheet material. The hollow tube may be provided adjacent to and in abutment with the rod of aerosol generating material, wherein the hollow tube has a length in an axial direction of 5 mm or less.
