Abstract (en)

[origin: WO2022229821A1] Apparatus, methods, and systems are provided for applying, or use with, a multibarc treatment protocol to a human limb. The apparatus may comprise a bag formed to surround at least a portion of the limb; a connection arrangement mounted to a wall of the bag in a distal portion of the bag, effective to enable therethrough a flow of a gas between the pressure-regulating device and an interior space of the bag; and a gas-permeable strip affixed to or integral with an interior surface of the bag.
