Abstract (en)
[origin: WO2022156959A1] The invention relates to a provision device and to a method for providing at least one item of status information (Z) which relates to a high-voltage battery (14) of a motor vehicle (10) and is captured by means of at least one capture device (16) of the motor vehicle (10). In this case, if an emergency call system (18) of the motor vehicle (10) sets up an emergency call connection (24) for transmitting an emergency call (N) to an associated emergency call centre (20a) outside the motor vehicle, the at least one item of status information (Z) is automatically made available to the associated emergency call centre (20a) together with the emergency call (N).
