Abstract (en)

[origin: WO2022157655A1] A vehicle (10), in particular of the cycling type, especially consisting in a bicycle, and preferentially in the form of a mountain bike, a city bike, or the like; the vehicle comprises a support frame (12), wheel means, respectively front (14) and rear (16) wheel means, said front wheel means (14) comprising a first (141) and a second (142) wheels that are side-by-side to one another and supported by respective first and second struts (143, 144), and steering means (18), in particular in the form of a respective handlebar, in particular from which a respective steering control shaft (180) extends. Furthermore, articulated connecting means (20) are provided between said steering means (18), or handlebar, and said first and second front wheels (141, 142), in particular between said steering control shaft (180) and said first and second struts (143, 144) for supporting said first and said second front wheels (141, 142). Said first and second struts (143, 144) for supporting said first and said second front wheels (141, 142) extend tilted forward at least at the respective upstream end at said articulated connecting means (20).
