Abstract (en)

[origin: WO2022157147A1] The present invention relates to a composition of oil of microorganisms enriched with eicosapentaenoic acid and with docosahexaenoic acid predominantly in the form of diglycerides, as well as to its acquisition method. To this end, the invention relates to a composition of oil of microorganisms that is characterised in that it comprises: - an eicosapentaenoic acid and docosahexaenoic acid content that is greater than or equal to 500 mg/g of composition, and, with respect to the total amount of glycerides: - an amount of diglycerides that is greater than 45%; - an amount of monoglycerides and of diglycerides that is greater than 60%.
