Abstract (en)  
[origin: WO2022156845A1] The subject of the invention is a motor vehicle lock housing arrangement which is equipped with at least one lock housing (1) and one carrier housing (2). The lock housing (1) is designed to receive at least one locking-mechanism-side component (6, 7, 8), for example an actuator (6, 7, 8). The carrier housing (2) has at least one electronic carrier (4). The lock housing (1) and the carrier housing (2) are connected together in a media-tight manner. According to the invention, the carrier housing (2) and the electronic carrier (4) define a preassembled structural unit (2, 4, 5) which is coupled modularly to the lock housing (1) with at least one seal (16) interposed.
