Abstract (en)

[origin: WO2022157036A1] The present invention relates to a method, a computer program with instructions and a device for controlling the output of confidential information in a vehicle. The invention furthermore relates to a vehicle in which a method according to the invention or a device according to the invention is used. In a first step, a user input is received (10), the information comprising a selection of an output device to be used for outputting the confidential information. The confidential information is then received (11), and the information is subsequently output (12) by the selected output device.
