Abstract (en)
The present invention provides a refrigerator; the refrigerator comprises a refrigerator body, and a door body located on the front side of the refrigerator body to open or close the refrigerator body, the refrigerator body comprising an inner container and a housing located on the outer side of the inner container; and the refrigerator further comprises a mounting box provided between the inner container and the housing, and a main control board provided in the mounting box, the mounting box being provided with an opening opened forwards to mount and disassemble the main control board. The present invention can greatly simplify the maintenance steps, shorten the maintenance time, and reduce the maintenance costs.
