Abstract (en)

The present invention discloses a coil winding and an aerosol generating device having the same. The coil winding includes a support body (1) and coils (3). An outer surface of the support body (1) is provided with an air groove (2), the coils (3) are wound on the outer surface of the support body (1) and at least partially cover the air groove (2), and an air interlayer is formed by the air groove (2) between the support body (1) and the coils (3).
