Abstract (en)
[origin: WO2022162234A1] The invention relates to a serving aid (2) comprising a first hand support surface which is designed to support the serving aid on a region of a hand of a person; and a first crockery holding region (18) comprising a first support region (24) and a second support region (28) for supporting a first crockery part (GT1), wherein the first and second support regions of the first crockery holding region are stationary relative to each other and have different orientations, and a force-fitting operative connection is produced between the first crockery part and the serving aid when the first crockery part is positioned so as to contact the first support region and the second support region.
