Abstract (en)  
[origin: WO2022161648A1] A folding box with integrated folding booklet (31), comprising • side walls (2, 3, 4, 5), wherein adjacent side walls are connected to one another at longitudinal edges via fold lines, • a side wall is connected via a fold line at a longitudinal edge to an adhesive flap (6) which is adhesively bonded to an adjacent side wall, • or a side wall has two portions which overlap one another and are adhesively bonded to one another, • an upper closure which covers an upper opening delimited by the upper edges of the side walls, • a lower closure which covers a lower opening delimited by the lower edges of the side walls, • a folding booklet comprising a plurality of sheets (32-35) which are connected to one another via fold lines at their longitudinal edges and are folded together about these fold lines and of which an outer sheet (32) is connected via a fold line to an upper edge of a side wall (2), • wherein the folding booklet is folded about the fold line between the outer sheet and the side wall against the inner side of the side wall, and the remaining sheets of the folding booklet are arranged between the outer sheet and the side wall.
