Abstract (en)
[origin: CA3207409A1] The invention relates to a container closure (10) comprising a base portion (16) which extends about a reference axis (100) of the container closure (10), a cap portion (18) which in a closed positioned covers a drinking hole (30) in the container closure (10) and in an open position leaves said drinking hole in the container closure (10) uncovered, and a tamper-evident ring (14) which is separate from the cap portion (18) and the base portion (16) and is interlockingly connected to the cap portion (18) and connected to the base portion (14) in a hooked manner. The tamper-evident ring (18) has an annular bead (56) that is not radially covered by the base portion (16) and extends in an annular groove (54) of an outer wall (34) of the cap portion (18), which wall faces radially outward.
