Abstract (en)
[origin: WO2022161861A1] The invention relates to a motor vehicle lock (1) comprising a locking mechanism (2) which has a pivotable latch (3) and a pivotable pawl (4) associated with the latch (3). According to the invention, the motor vehicle lock (1) comprises a spring assembly (11) and a pivotable preload lever (13) which is preloaded or can be preloaded in a preload direction (12) by the spring assembly (11) and which is in or can be brought into a preload gear engagement (14) with the pawl (4), and the preload gear engagement (14) is designed in such a way that the pawl (4) is preloaded or can be preloaded with a pawl preload in the catching direction (15) by means of the spring assembly (11) and via the preload gear engagement (14), and the preload gear engagement (14) is not self-locking in the main closing state and/or in the preclosing state as viewed from the pawl (4) to the preload lever (13).
