Abstract (en)

[origin: WO2022161781A1] One aspect of the invention relates to a household appliance system (1) having a first household appliance (2), at least one second household appliance (3) separate therefrom, and having a common central operating apparatus (6) which is designed and provided, as intended, for the purpose of setting operating conditions both of the first household appliance (2) and of the second household appliance (3), wherein the operating apparatus (6) has an electronic display area (7) having a first display field (8), in which information relating to the first household appliance (2) can be displayed, and a second display field (9), which differs therefrom and in which information relating to the second household appliance (3) can be displayed. One aspect also relates to a method.
