Abstract (en)  
[origin: WO2022167942A1] The invention relates to a cutting guide (15) of a mandible (20) comprising - a first shell (1) distal to the frontal plane, - a first cutting plane (2) fixed to the first shell (1), - a second shell (3) proximal to the frontal plane, - a second cutting plane (4) fixed to the second shell (3), - a connecting element (5) between the first shell (1) and the second shell (3), - a pair of reference elements (6) for positioning a prosthetic graft (30) in the mandible (20) to replace a pathological bone portion (40). The invention finds advantageous applications in the fields of maxillofacial surgery, otolaryngology (ENT) and plastic surgery, in particular for the treatment of bone tumour pathologies of the mandible.
