Abstract (en)

[origin: WO2023285008A1] The invention relates to a processing machine (01) and a method for processing a substrate (02), comprising at least one shaping unit (900) and/or at least one application unit (600), the at least one application unit (600) and/or the at least one shaping unit (900) each being equipped with at least one plate cylinder (616; 901) and at least one impression cylinder (617; 902), the at least one plate cylinder (616) of the application unit (600) being equipped with at least one application forme (628) having at least one application area (629), and/or the at least one shaping unit (900) being equipped with at least one shaping tool (915) having at least one working area (909), the application area (629) and/or the working area (909) being arranged so as to cover at least part of the lateral surface of the at least one plate cylinder (616; 901), wherein a speed ($v1$; $\omega1$) of the at least one plate cylinder (616; 901) and a speed ($v2$; $\omega2$) of the at least one impression cylinder (617; 902) are at a speed ratio ($v1/v2$; $\omega1/\omega2$).
