Abstract (en)

[origin: WO2022167350A1] The invention relates to a vehicle (1) comprising an electric battery and an electric socket (10) for supplying electricity to the battery, the socket (10) being positioned in a bodywork element (13) defining the vehicle (1) so as to be accessible from outside the vehicle (1). According to the invention, the socket (10) comprises guide means (50, 51) for routing a tip (11) of a power supply gun (12) opposite the socket (10), such that the head (11) can penetrate into a receiving area (15) of the socket (10) in order to ensure that the battery is electrically charged.
