Abstract (en)

[origin: WO2022167745A1] Preserving can comprising a tubular body having two opposite ends closed respectively by a lower lid (4) and an upper lid (3), the upper lid having a removable upper part having a surface area at least greater than 90% of a surface area of the upper lid in order to be able to empty food from the can, and the lower lid having a removable lower part (42) delimited by a lower rupture starter line (43) and provided with a lower opening member (44), the removable lower part having at least one long and linear main section (45) having a width with a value of less than or equal to 3 millimetres and a length having a value of greater than or equal to 10 millimetres, in order to be able to drain a liquid juice from the can prior to emptying food therefrom.
