Abstract (en)
[origin: WO2022208023A1] The invention relates to a method for transporting non-flowable powders (P). This method comprises the following steps: mixing and suspending powders (P) and carbon dioxide in solid form, with introduction of a cryogenic fluid (FC), to give a cryogenic suspension (SC); mobilising the cryogenic suspension (SC) to allow it to be transported; controlling the mobilization of the cryogenic suspension (SC) as a function of one or more parameters linked to the first step of mixing and suspending.
