Abstract (en)

[origin: WO2022167200A1] A filter housing (6) in the shape of a sector of a circle for a brake dust particle filter (3) has two mutually spaced-apart housing side walls (7, 8) which delimit a receiving space (10) lying in between for a brake disc (4). The first housing side wall (7) is composed of a housing main wall (7a) and a supporting bridge (11) adjoining the latter in the circumferential direction, wherein the second housing side wall (8) extends over a smaller angular segment than the first housing side wall (7).
