Abstract (en)
[origin: WO2022167278A1] The invention relates to a target launching machine, comprising a base (200) and a turret (300) on which a launching unit is mounted, the turret (300) being rotatably movable relative to the base (200) along a main axis (700), the base (200) comprising an upper surface and the turret (300) comprising a lower surface facing the upper surface, which target launching machine comprises an intermediate system (100) positioned between the upper surface and the lower surface, the intermediate system being in contact with the upper surface and the lower surface, and forming a sliding interface between the intermediate system and the upper surface and/or the lower surface.
