Abstract (en)

[origin: WO2022162044A1] Light box (1) for the photography and/or videography of an object, comprising:- a housing (3) comprising a plurality of walls defining an internal volume and an access point (5) provided on one face of said housing and intended to face a user, said access point (5) being designed to allow the insertion of at least one hand into it;- an illumination and visualization system (1) that is accommodated in the housing (3) and defines a working volume (7) in communication with the access point (5); wherein the illumination and visualization system (19) comprises:- at least one light diffusing element (21) which is situated at a predetermined distance from at least one of the walls in order to define a gap (23) between the light diffusing element (21) and said one of the walls, the light diffusing element (21) at least partially delimiting the working volume (5);- at least one light source (25) that is situated in the gap (23) and arranged so as to illuminate the working volume (5) diffusely through the light diffusing element (21);- at least one point light source (25, 35), which is extinguishable, able to be covered or removed, and arranged so as to directly illuminate the working volume (5);- at least one digital camera (31) mounted inside the housing (3) and arranged so as to be able to photograph at least a part of the working volume (5).
