Abstract (en)
A quick-release clip, particularly for wearable articles (2) comprises a male component (3) carrying a plate-like insert (6) and a female component (4) having a containment channel (7) configured to accommodate the plate-like insert (6) along an insertion direction (Z). The male component (3) also comprises an engagement wing (12) extending near the plate-like insert (6) and carrying an engagement tooth (14) projecting towards the plate-like insert. The containment channel (7) is delimited by a covering wall (8) that has an engagement seat (15) configured to engage the engagement tooth (14).
