Abstract (en)
According to the present disclosure, a clothing care machine is provided, which includes a body having an inner container and a care system including a rotating unit and an air supply unit, the air supply unit includes an air supply box and a first air supply assembly located within the air supply box, the air supply box has an airflow circulating channel communicated with the inner container for circulating the airflow between the inner container and the air supply box; the first air supply assembly and the rotating unit are located within the body, and the rotating unit and a portion of the air supply box are located above the inner container, the first air supply assembly is located on the side of the rotating unit, and a portion of the rotating unit is inserted into the airflow circulating channel. According to the present disclosure, the clothing care machine reduces the overall height space of the clothing care machine occupied by a rotating unit and an air supply unit on the basis without occupying the space in the height direction of the inner container.
