Abstract (en)
The present invention relates to a downhole expandable tubular assembly, such as a patch, having a longitudinal axis, to be expanded in a well downhole to abut an inner face of a casing or a borehole, the downhole expandable tubular assembly having an unexpanded condition and an expanded condition, and comprising a tubular part comprising an outer face and an inner face, and a sealing arrangement comprising a sealing compound arranged on the outer face facing the inner face, wherein the sealing arrangement further comprises an expandable tubular network. The invention further relates to a downhole system comprising a setting tool supporting the downhole expandable tubular assembly.
