Abstract (en)
[origin: WO2022172306A1] The invention relates to a dumping hopper (CA) substantially comprising: - a frame (1) provided with a first pair of wheels (2') for resting on the ground and moving and with seats (3) for coupling to the forks of lift trucks; - a collection box (4), provided with a second pair of wheels (2'') for resting on the ground and moving and with fastening means (5) adapted to allow the rotation thereof on the front portion of the frame (1); - release means of the collection box (4) adapted to determine the switching thereof from a horizontal loading position to an oblique unloading position. Said dumping hopper (CA) further comprising a unit (11) for the automated actuation of the release means of the collection box (4), which may be selectively activated by means of a remote command generated by a remote control.
